What's My Fraction?

Materials:

- Colored square tiles
- Folder
- Fraction bar recording sheet
- Crayons or colored pencils

Directions:

- 1) Pick a partner. Choose 6 color tiles. Be sure to have at least 2 different colors of tiles. Draw the polygon you have created on the geoboard square on the recording sheet.
- 2) Put a folder between you so you cannot see each other's work and build a fraction bar with the tiles. Create and write 4 clues to describe the polygon you have made using shape vocabulary.
- 3) Use fractions to describe your fraction bar to your partner. Based on your fraction clues, your partner should build a replica of your fraction bar.

Example: $\frac{1}{3}$ of my fraction bar is green

- 4) Record your work
- 5) Now it's your partner's turn to build a fraction bar and provide you clues to build a replica of it!
- 6) Repeat, this time building a fraction bar using 8 tiles, 10 tiles, and 12 tiles.
